PROJECT TITLE

CREATING AN EMPLOYEE PERFORMANCE SCORECARD IN EXCEL

AGENDA

1.problem statement
2.project overview
3.End users
4.our solution and proposition
5.Dataset Description
6.Modelling Approach
7.Results and discussion
8.Conclusion.

Problem statement

To write a problem statement on employee performance, you need to identify the specific area of performance that is problematic, such as low productivity, high absenteeism, or poor quality of work.

Project overview

1. Define Objectives: Clearly outline the project's objectives, goals, and success criteria.

2.Identify KPIs: Determine the key performance indicators that align with project objectives.

3. Set Targets: Establish target values for each KPI to measure progress against.

End users

An end user is a person or other entity that consumes or makes use of the goods or services produced by businesses. In this way, an end user may differ from a customer—since the entity or person that buys a product or service may not be the one who actually uses it.
